PROFILE

Front-end developer who has 2+ years of experience from series A start up based in London, dedicated to building user-focused websites for the customers and improving inefficient process. Experience has taught me to take accessibility and responsiveness seriously, and I am eager to continue my career at a company where I will continue expanding my JavaScript knowledge into perfecting accessibility and responsive design.

EMPLOYMENT HISTORY

Sep 2020 — Aug 2022

Front-end Developer, Bepro-UK LTD (sports video and data analysis start up)

London

- Assisted the development team in maintaining 4 websites.
- Translated 50+ UI/UX designs to code, resulting in visual elements of the application.
- Automated a error checking of football match analyzing, achieving reduction of a total analysis cost by up to 40% per match.
- Separated a landing page to Webflow platform, changed domain name to meet company standards for SEO and accessibility.
- Built a CI/CD pipeline using Github Actions to enhance the deploying process.
- Integrated Slack with Github Actions to provide a monitoring systems of deploying process which improved communication with other teams.
- Led troubleshooting, fixed 500+ bugs and other issues, and updated sites throughout production lifecycle.
