Working Experience

Bepro-UK LTD

Video and data analysis services for sports used by more than 2,000 teams in about 40 countries around the world.

Frontend Developer

2020.09 ~ 2022.08

- Improved deploying environment and the way of monitoring error that is occurred from web platform.
- Coordinated a visualization of analyzed football data in web platform.
- Changed a domain name of web platform for the branding strategy and communicated with marketing team by making deployment scenario using AWS S3, CloudFront and Route 53.
- Developed an overall front end of the platform for providing data for young football players for KFA(Korea Football Association).

Competency

I'm the frontend dev who is   .

Fast learner

- Implemented the overall front end of platform for young football players for KFA (Korea Football Association) in 2 months right after graduated a coding bootcamp. (07.2020~ 08.2020, 09.2020~10.2020)

Dedicating for improving inefficient processes and development environments

- Added a logic for automating the checking error in analysis process to Bepro Analysis Program(product for analyzing football match). Reduced total analysis time by up to 40% per match. (04.2022 ~ 08.2022)
- Added a feature for managing football schedules and uploading videos by user side to improve the inefficient way of setting & uploading them up manually by Bepro CS team. (09.2021 ~ 03.2022)

- Added a Google Cloud Function for regular data backup <u>to improve the stability of data</u> that is managed by Firestore in Bepro Editor(product for editing video)

- Seperated the Bepro landing page to Webflow platform to<u> improve the managing convenience of marketing team and reduce a communication cost between the marketing team and product team</u>.

- Built a CI/CD pipeline using Github Actions to <u>enhance the deploying process which was manually deployed by developers from Bepro frontend team</u>. Integrated Slack with Github Actions to provide a monitoring systems of deploying process which <u>improved communication with other teams</u> regarding the updates of the products.

Deeply sympathize with the user's discomfort

- Added the feature of sign in with Apple to the Bepro web products <u>to solve the problem of the users who were signed up with Apple account from Bepro IOS app were not being able to sign in to other platforms</u>. (06.2022~07.2022)

- Provided a monitoring systems of error that is occurred from web platform to <u>improve a user experience and communication with Bepro CS team</u>.

- Improved upload operations to resumable upload in Bepro web platform <u>to improve the inconvenience of users who have to re-upload from the beginning</u> when the internet got disconnected

Love the developing process for the data visualization

- Implemented a <u>feature</u> that embeds a football player's analyzed data to the video of match to Bepro Editor(product for editing video) (04.2022 ~ 05.2022)

- Implemented a <u>feature</u> that helps comparing football player's analyzed data in Bepro web platform. This feature affected making contract with one of the teams of German 2nd division (12.2020 ~ 04.2021)

Skill

• React	• TypeScript	• Javascript	• HTML5
• CSS3	• SCSS	• Next.js	• Three.js

Education

Code States

(https://www.codestates.com/)

Advance software engineering, Immersive program

2020.03 ~ 2020.08
